SUMMARY

Junior Network Engineer with CCNA-level training (Cisco Networking Academy) and 250+ hours of hands-on lab experience configuring real Cisco hardware (routers, Layer 2/3 switches, WLCs, IP phones). Proficient in routing, switching, network security, and VoIP configuration. Skilled in designing and deploying enterprise network topologies using Cisco Packet Tracer and GNS3, with hands-on Windows Server/Active Directory administration. Targeting Junior Network Engineer or Network Support Engineer roles in enterprise or ISP environments in Cairo.

CORE SKILLS

Networking: TCP/IP, IPv4/IPv6, VLANs, STP, EtherChannel, OSPF, EIGRP, HSRP, DNS, DHCP
Security: ACLs, NAT/PAT, IPSec VPN, GRE, AAA, TACACS+, RADIUS, Cisco ASA Firewall
VoIP: Cisco CME, SCCP, SIP, FreePBX
Systems: Windows Server 2019, Active Directory, DNS, DHCP, VMware ESXi
Tools: Cisco Packet Tracer, GNS3, Cisco IOS

TRAINING EXPERIENCE

Networks & Cybersecurity Track | *WE School for Applied Technology* Sep 2024 – Jun 2026 (Expected)

- Completed 250+ hours of hands-on lab training on real Cisco routers, Layer 2/3 switches, WLCs, Access Points, and Cisco IP Phone 7942G — physical hardware, not simulations.
- Configured and troubleshot 5+ enterprise network scenarios on physical Cisco devices: VLANs, OSPF, EIGRP, NAT/PAT, ACLs, STP, EtherChannel, HSRP, AAA/TACACS+/RADIUS.
- Planned and deployed 15+ complete lab network topologies from planning through IP addressing, configuration, verification, and documentation.
- Installed VMware ESXi hypervisor and administered Windows Server 2019 with Active Directory, DNS, and DHCP, supporting 20+ simulated user accounts.
- Built VoIP environments using Cisco CME and FreePBX with SIP trunks; implemented separate Voice/Data VLANs with DHCP Option 150 for QoS.

PROJECTS

Enterprise Network Design & Implementation | *Cisco Packet Tracer*

- Designed a dual-site topology (HQ & Branch) with 17+ Cisco devices across 3 layers (Core, Distribution, Access), 7 VLANs, and inter-VLAN routing via Layer 3 switches.
- Configured OSPF multi-area routing, HSRP gateway redundancy, and STP optimization (PortFast, BPDU Guard, RSTP).
- Applied ACLs, NAT/PAT, Port Security, DHCP Snooping, DAI, SSH, Syslog, NTP, TFTP backup, and WLC/AP provisioning for centralized wireless management.

Site-to-Site IPSec VPN Lab | *Cisco Packet Tracer*

- Configured IPSec VPN using IKE Phase 1 & 2, AES encryption, and SHA hashing between branch routers; verified secure, encrypted traffic across WAN links.

GRE Tunnel with Dynamic Routing Lab | *Cisco Packet Tracer*

- Implemented GRE tunnels between remote sites and verified dynamic route exchange and end-to-end connectivity across the tunnel.

ASA Firewall with DMZ | *Cisco Packet Tracer*

- Configured Inside/Outside/DMZ zones and ACLs to secure the network perimeter while exposing a DMZ web server.

Full configuration files and documentation for all projects available on GitHub (link above).

EDUCATION

Networks & Cybersecurity Diploma | *WE School for Applied Technology, Cairo* Expected 2026

3-year specialized technical institute; specialized in Networks & Cybersecurity from Year 2 with in-depth study of routing, switching, and security.
